## WIOSymphony training

### MSP Expert team:

- Abdulqadir Ziyad
- Potlako Khati
- Elke Talma
- Jemima Doudee

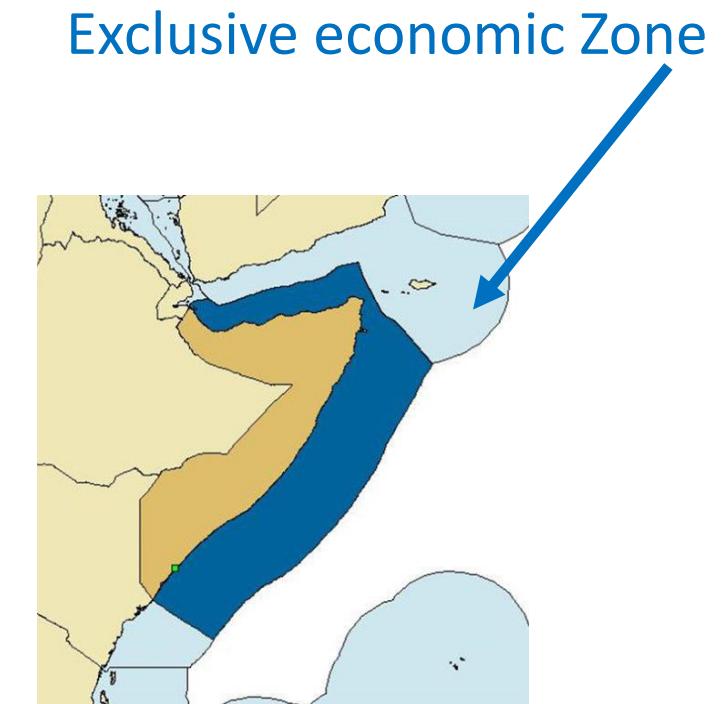

### GIS expert (support staff):

- Edmond Sacre

# Somalia Marine Spatial Planning Initiative

- **Area:** Somalia eco-region from Gulf of Aden to Southern border

Terrestrial I territory

# Somalia Marine Ecosystem Mapping

# Somalia Marine Spatial Planning Initiative

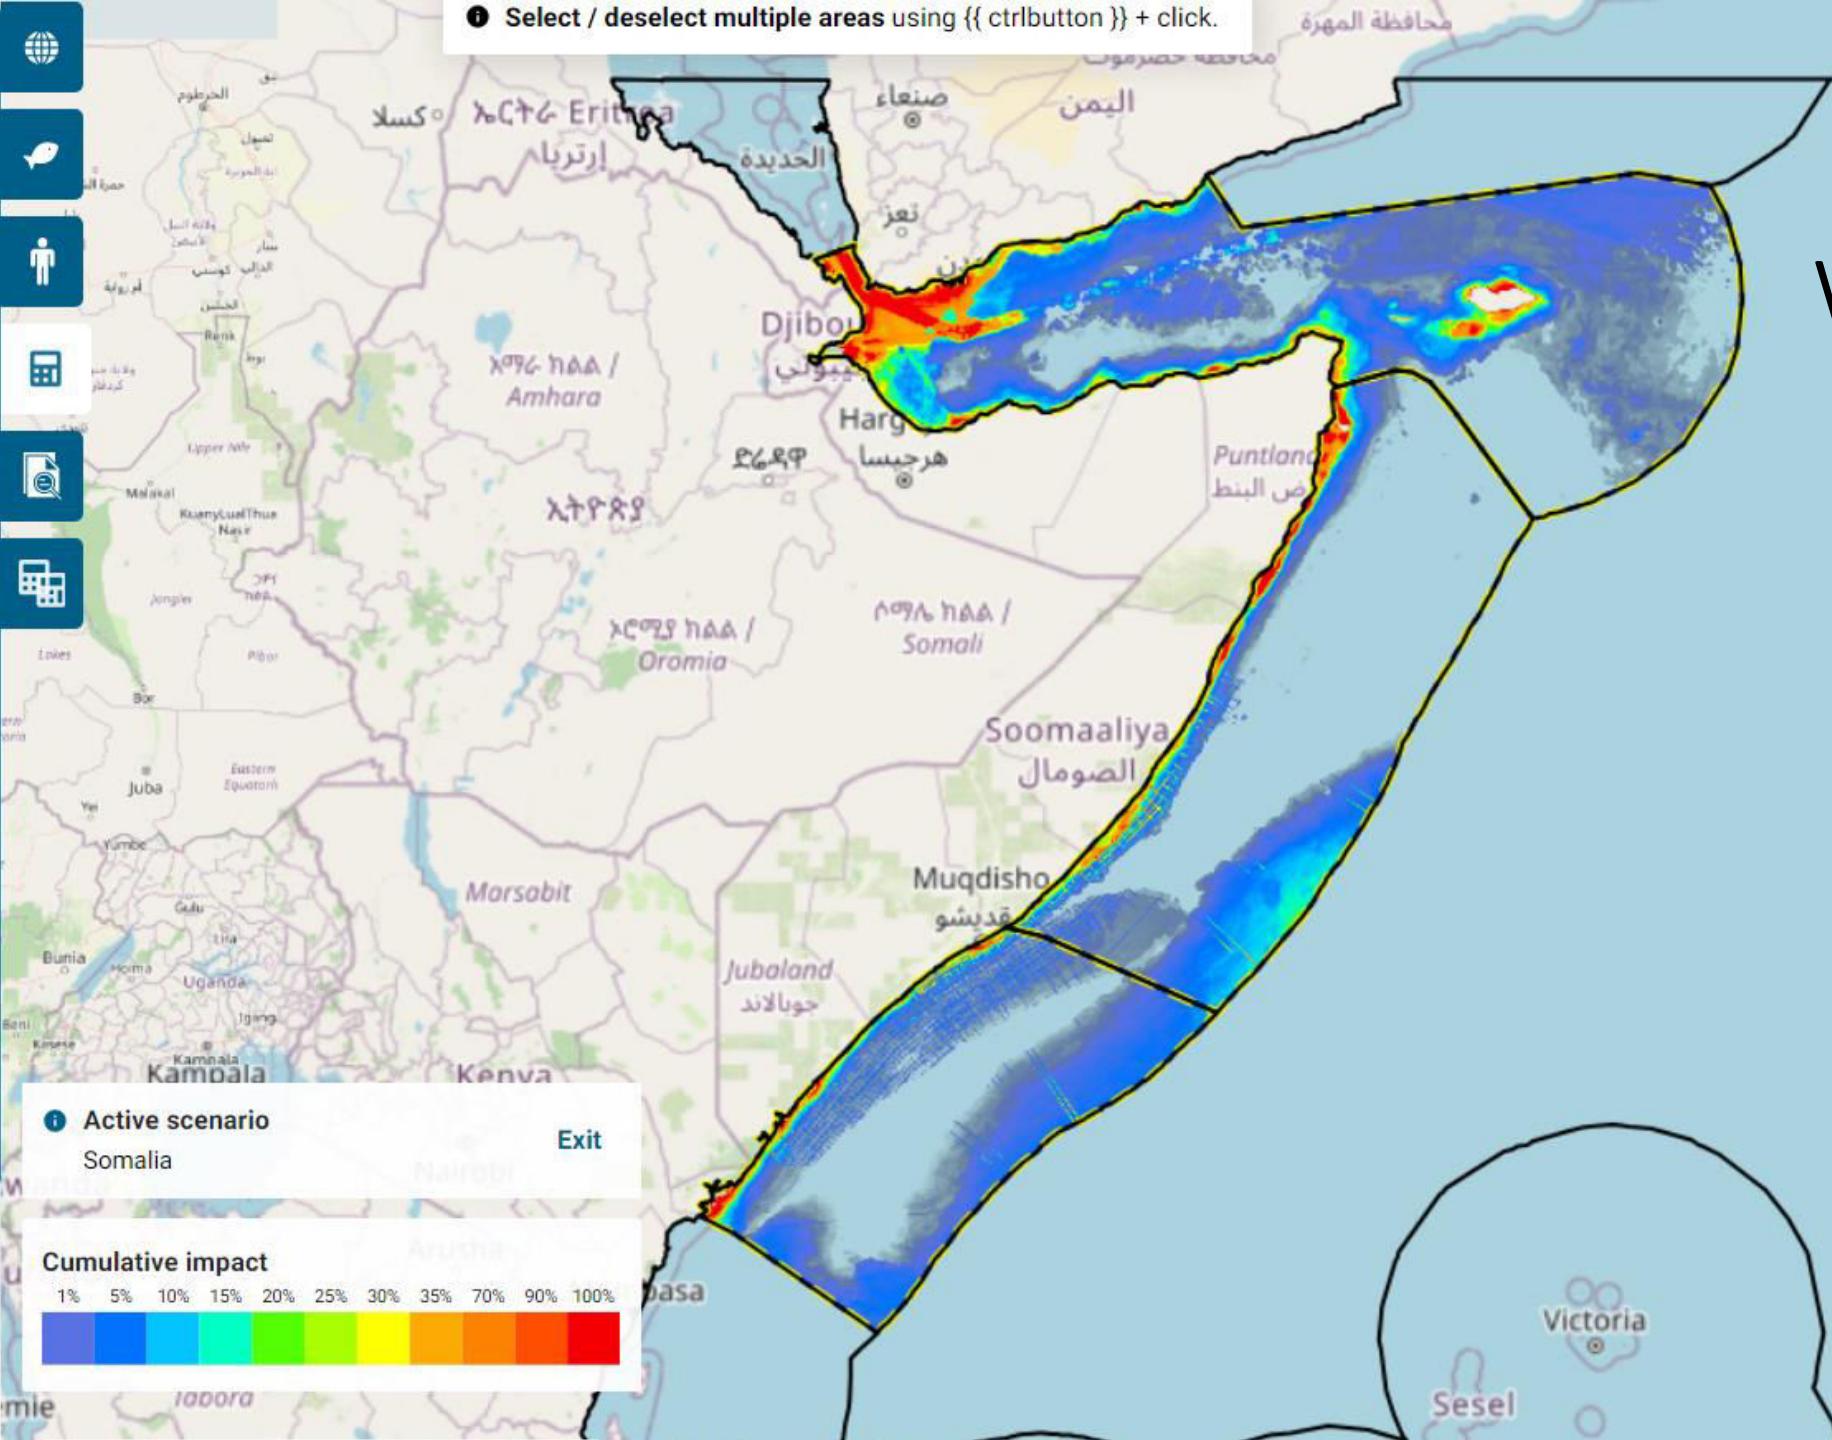

- **Ecosystems:** tropical habitats, coral reef, seagrass, mangroves, salt marshes, shallow hard bottom, shallow soft bottom, continental shelf (40 to 200m), fish, birds, invertebrates, dugongs, dolphins, turtles)

# Somalia Marine Spatial Planning Initiative

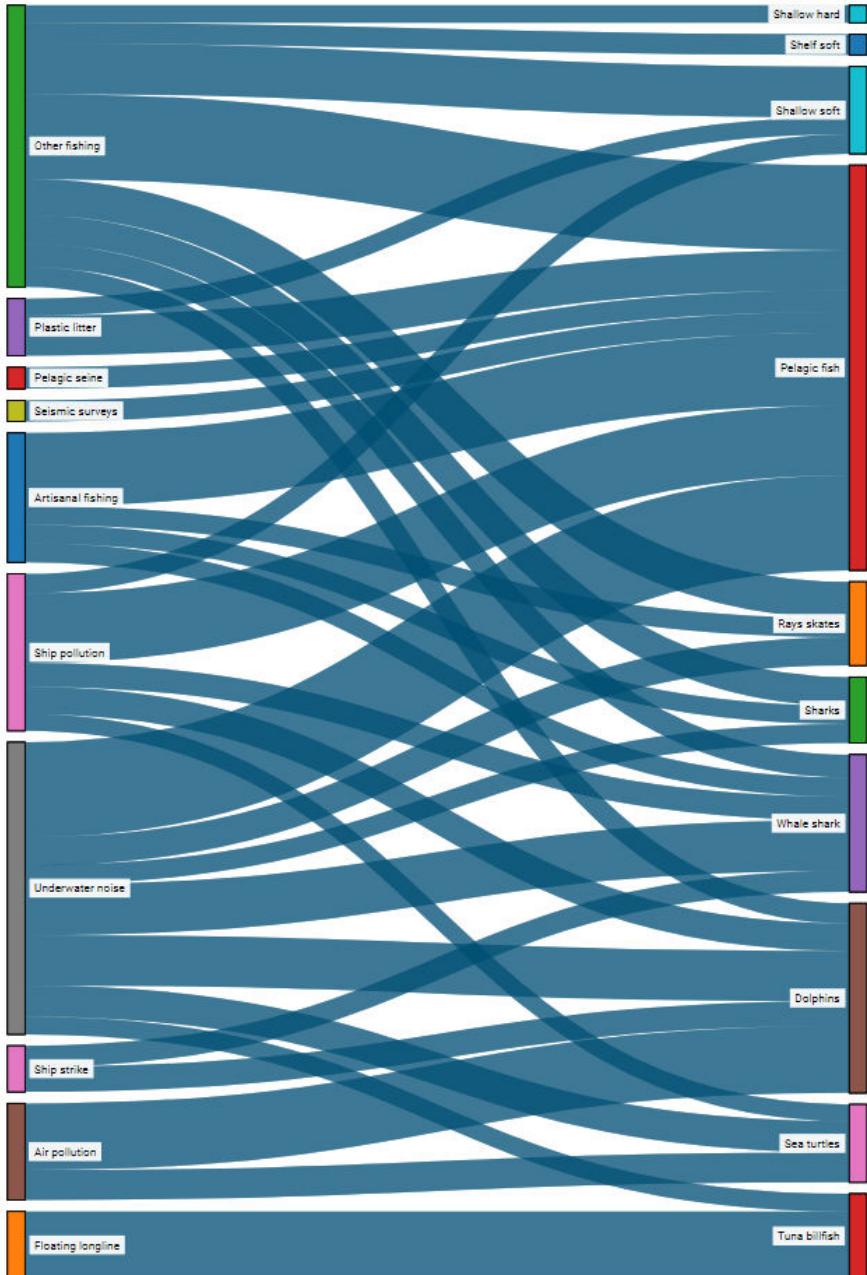

- **Pressures:** IUU (other fishing), commercial fishing, artisanal fishing, eutrophication, submarine cables, plastics, shipping (CC not included to keep things simple)

# WIOSymphony tool output **(MAP - baseline)**

# WIOSymphony tool output **(SANKEY DIAGRAM – baseline)**

Shallow soft

Other fishing

Plastic litter

Pelagic seine

Seismic surveys

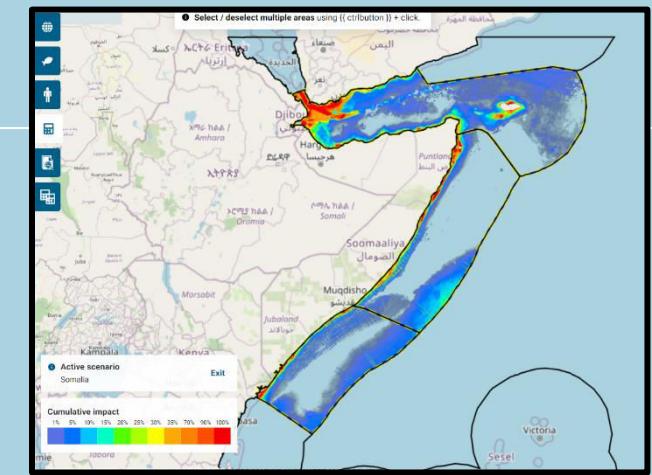

Artisanal fishing

Pelagic fish

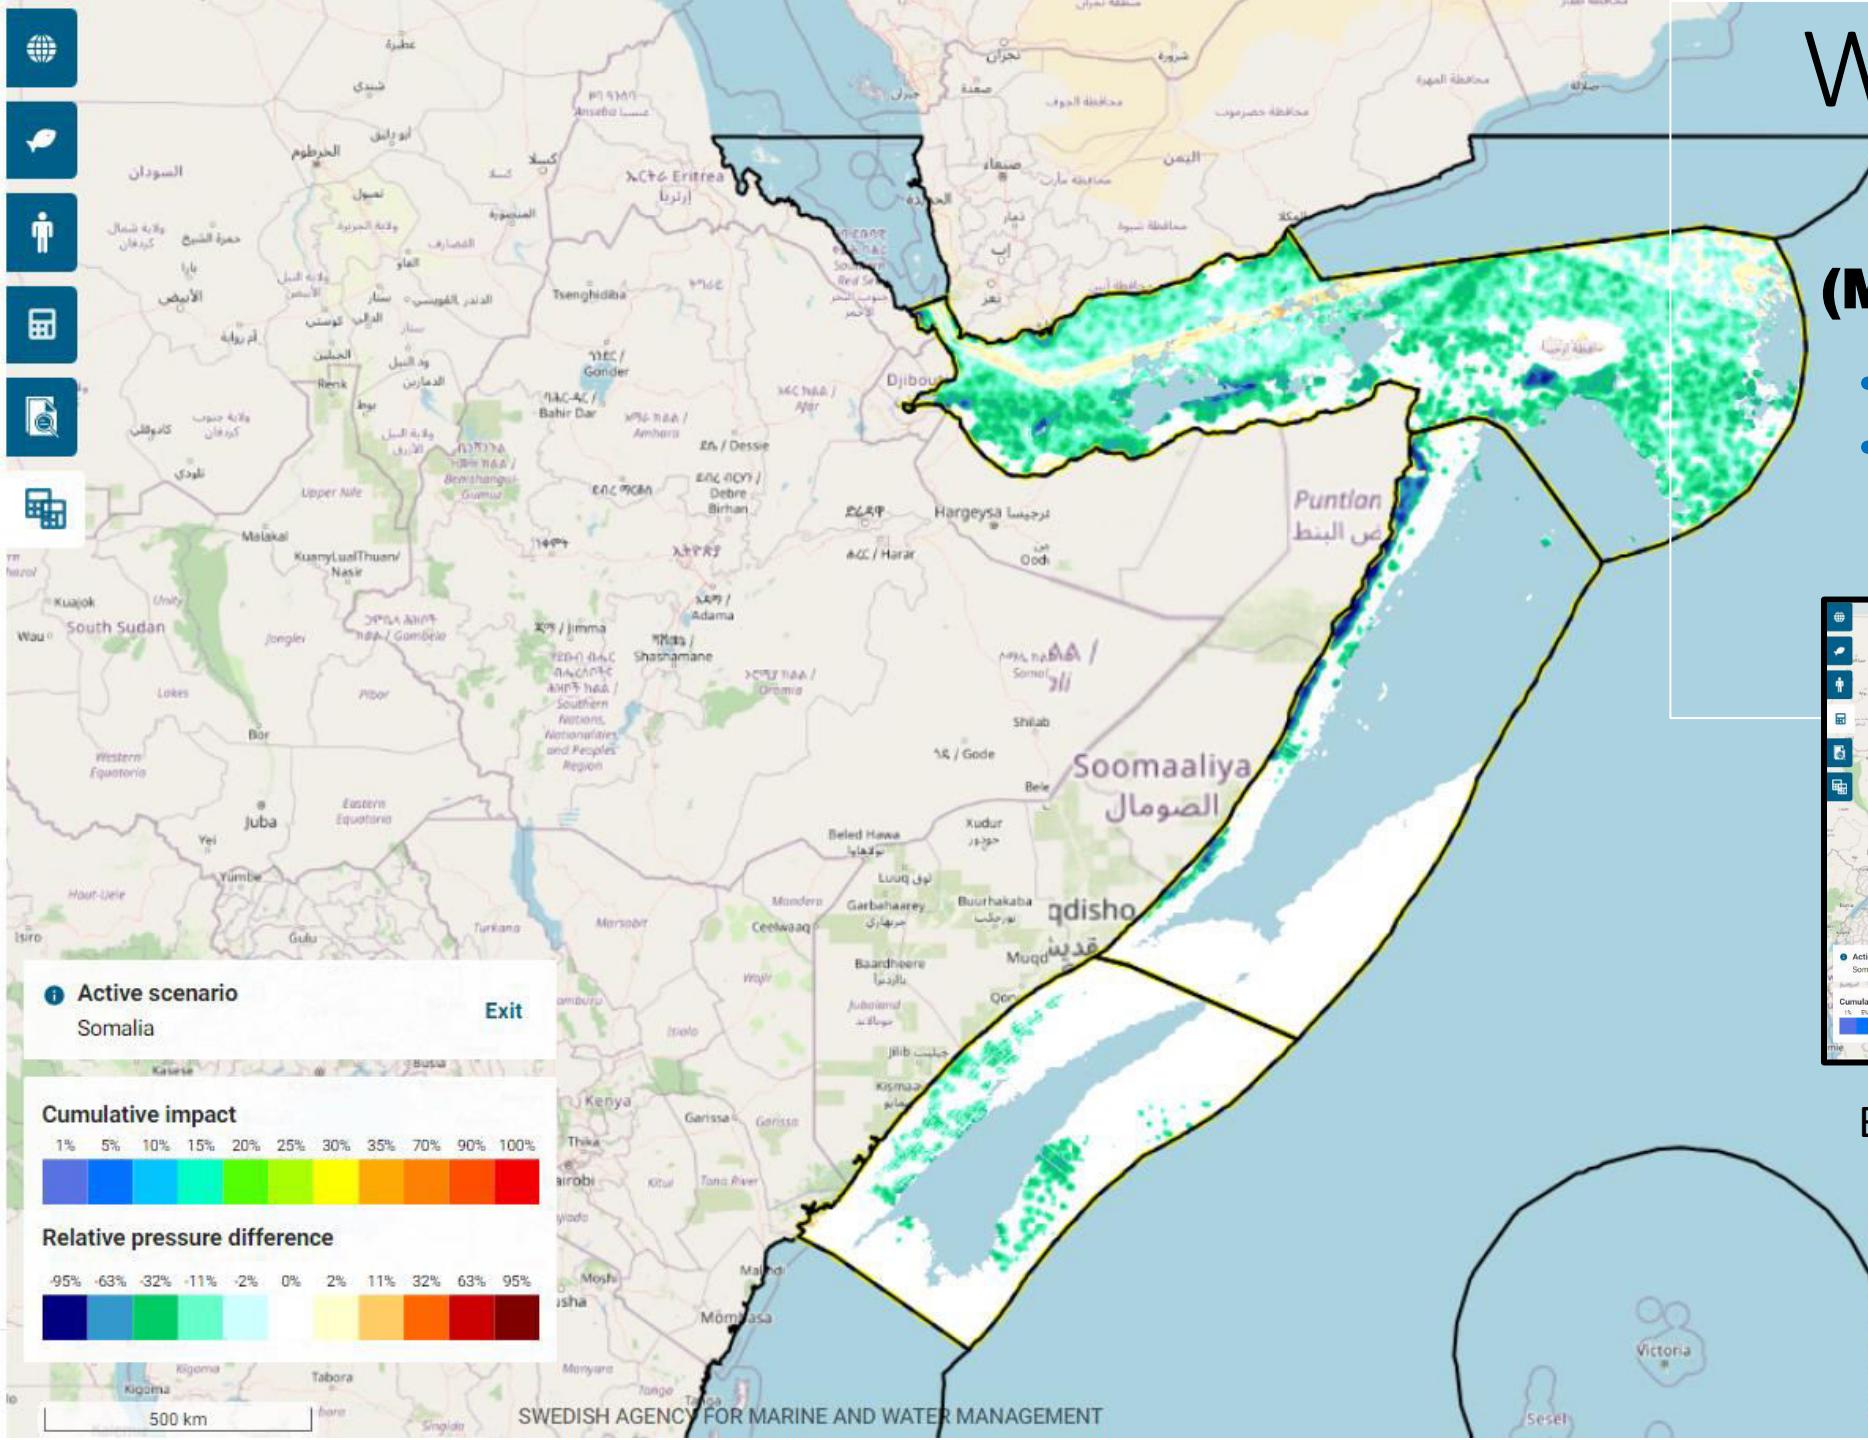

# WIOSymphony tool output

**(MAP – future scenario)**

- 0% IUU
- +20% shipping

SWEDISH AGENCY FOR MARINE AND WATER MANAGEMENT

# WIOSymphony tool output:

Increased shipping (+20%) is expected to negatively impact:

- Pelagic fishery
- Sea turtles
- Whale sharks
- Marine mammals
- Coral reefs
- Seagrass meadows

# WIOSymphony tool output:

Decreased IUU / other fishing (-100%)

is expected to positively impact:

- Shallow bottom
- Pelagic fishes
- Rays & skates
- Marine mammals
- Sea turtles
- Seagrass meadows
